**Hello all,**

**Monday morning emergency repairs were performed between mile 6-7 just above the bridge at the large culvert that failed.**

*Please use **EXTREME** caution when coming in or out, since we have lost more than half of the original roadbed.*

*I have installed a flashing barricade (for night time) and reflective cones. Photos attached.*

**Happy Holidays to all, and a big thank you to Darrell Rogers, John Schaefer and all involved in the speedy response to the temporary repair over the Holidays, we would have most likely lost the entire road in the next big rains!**

**Regards,**

**DavidOtero**
